Subject: Comments on the Draft Environmental Impact Report for the Scholl Canyon Landfill Expansion Project (State Clearinghouse #2007121023)

Dear Ms. Bogdanoff:

The Eagle Rock Association (TERA) appreciates this opportunity to provide comments on the Draft Environmental Impact Report (DEIR) for the proposed Scholl Canyon Landfill (SCLF) Expansion Project. The Eagle Rock Association (TERA) is an inclusive membership organization serving the residents and businesses of the Eagle Rock community within the City of Los Angeles. TERA's mission is to work for improvement of the quality of life in The Eagle Rock community.

In reaction to the Draft Environmental Impact Report [DEIR] which proposes an expansion and extension of the Scholl Canyon Landfill, TERA is submitting comments to the DEIR, stating its opposition to the expansion, and attaching a petition signed by over 350 stakeholders to oppose the SCLF expansion.

Please direct any questions regarding these comments, as well as appropriate responses, to me at erbobg@gmail.com.

Sincerely,

Bob Gotham
President

Enclosures:

1. Comments to the DEIR.
2. Comments collected on-line
3. Petition signatures collected on-line
4. Petition signatures collected in-person

The Eagle Rock Association offers the following comments on the City of Glendale's Draft Environmental Impact Report for the Scholl Canyon Landfill Expansion Project (DEIR, April 2013, State Clearinghouse No. 2007121023).

| Section | Subsection | Comment |
|-----------------------|-------------|--|
| 1 – Executive Summary | 1.1.2 | <p>Please align the DEIR with the Los Angeles County Countywide Integrated Waste Management Plan 2012 Annual Report, (“2012 LACo Waste Management Plan”) (page 59), which establishes the County’s intent to expand SCLF, and reasonably presupposes that a Statement of Overriding Consideration will be adopted by City of Glendale. Please clarify the Statement of Overriding Consideration process and the process to secure a permit after a Statement of Overriding Consideration is accepted by the Glendale City Council. Please also clarify that Post Closures uses according to LA County include “for the implementation of solid waste management alternatives or other facilities related to the operation of a sanitary landfill on the premises.” Please note that the 2012 LACo Waste Management Plan appears to be the first public document in SCLF’s 50+ year history that introduces this possibility that SCLF’s Post Closure Use might not be open space, but rather as a long-term waste management facility. Finally, please clarify that SCLF’s extended estimated remaining life based on 2012 Average Daily Disposal Rate is an additional 21 to 26 years, to the year 2049 or 2055.”</p> <p>The 2012 Annual Report, Los Angeles County Countywide Integrated Waste Management Plan (page 59) establishes the County’s intent to expand SCLF such that its useful life is extended by either 21 years or 26 years based on SCLF’s 2012 Average Daily Disposal Rate. The 2012 LACo Waste Management Plan also states that SCLF’s Post Closure Use may be “for the implementation of solid waste management alternatives or other facilities related to the operation of a sanitary landfill on the premises.”</p> |
| 1 – Executive Summary | 1.1.1 | <p>Project Purpose and Objectives. The first paragraph of the EIR states that, "The proposed project would allow for the <i>continued</i> disposal of non-hazardous municipal solid waste at the currently permitted daily tonnage levels of 3,400 tons per day [emphasis added]."</p> <p>Please clarify this statement as the 2012 LACo Waste Management Plan (page 58) states SCLF’s current disposal rate is 675 tons per day (TPD), six days a week. We fear that overstating the disposal rate understates the projected life of an unexpanded SCLF and biases reviewers towards a decision to expand the landfill.</p> |
| 1 – Executive | 1.1.3, 3.1, | Please acknowledge the role that City of Los Angeles roads |

| | | |
|-----------------------|---------|--|
| Summary | and 4.1 | play in facilitating access to the landfill site. In fact, access to the landfill site requires passage through the City of Los Angeles regardless of whether waste hauling trucks access Scholl Canyon Road via SR-134 or local roads such as Colorado Blvd and Figueroa St. This has significant impacts on City residents and businesses in terms of noise, roadway degradation, congestion, air quality, odor, and litter, which the Report does not acknowledge when describing the landfill as directly accessible by SR-134. |
| 1 – Executive Summary | 1.1.4.1 | Site History. The last sentence states that, "... the site would reach its currently permitted capacity in the year 2021." However, the 2012 LACo Waste Management Plan (page 58) states SCLF's estimated remaining life is 16 years, or to 2028. Please clarify SCLF's estimated remaining life. Please also clarify that with expansion, SCLF may remain open until either the year 2049 or 2055. |
| 1 – Executive Summary | 1.2.1 | Areas of Known Controversy. The second sentence states that "There were no known areas of controversy at the time the NOP was prepared." On the contrary, SCLF is quite controversial. Please revise the assessment of Known Controversy to include the following points. 1) The landfill's conception in 1958 pitted the cities of LA County against each other, resulting in long-standing dispute between Glendale, the City of Los Angeles, LA County Administrators. 2) Since its opening in 1961, SCLF has been opposed by past and present LA Councilmen, including Jose Huizar, John Holland, and Edward Roybal. 3) While two access roads were initially proposed, one from Glenoaks Boulevard in Glendale and another from Figueroa Street in Los Angeles, the Glendale City Council prohibited trash trucks on Glenoaks Boulevard, leaving Figueroa Street as the only option. 4) Despite being accessed from only the City of Los Angeles, Los Angeles has not been able to use the dump since 1987 when the City of Glendale passed Ordinance 4780. 5) Please note that the 2012 LACo Waste Management Plan is the first public document in SCLF's 50+ year history that introduces this possibility that SCLF's Post Closure Use might not be open space, but rather "for the implementation of solid waste management alternatives or other facilities related to the operation of a sanitary landfill on the premises." 6) daily dozens of dirty, noisy trucks transit immediately adjacent to at least two Historic Cultural Monuments in Los Angeles: the Eagle Rock and the Eagle Rock Recreation Center. 7) SCLF's access point is adjacent to homes, schools, a child-care facility, a major City park, and a historic cultural monument – all in the City of Los Angeles. As such, Los Angeles bears a significant burden from the operation of the landfill, including |

| | | |
|-----------------------|---------|--|
| | | trash and debris, pollution, traffic, and deteriorating road conditions in the area around the entrance to the landfill. |
| 1 – Executive Summary | 1.2.2.4 | Environmental Impacts Associated with the Project. Please discuss the <u>existing</u> adverse impact of Scholl Canyon operations on City of Los Angeles residents and businesses. Although continued/extended operation of the landfill may not impose <i>additional</i> near-term adverse impacts on these stakeholders, there are <u>existing</u> adverse impacts that must be addressed, which would be compounded with expansion. |
| 1 – Executive Summary | 1.3.1 | Summary of Alternatives. Please expand the discussion of Alternative Conversion Technology Efforts. The 2012 LACo Waste Management Plan includes a discussion of Los Angeles County’s Conversion Technology Efforts, City of LA Alternative Technology Efforts, California 75% Recycling, AB 32 – Reducing Greenhouse Gas Emissions in California, Markets for Recoverable Materials, Extended Producer Responsibilities, an anaerobic digester project in Perris, and the Zero Waste LA franchise policy. Please provide quantitative achievements of significant users of Scholl Canyon, in each of these waste reduction/management areas. Please provide a cost/benefit analysis of these waste reduction/management initiatives, whose inputs include air quality, health care costs, and youth populations (i.e. health risk assessments.) Please provide a more vigorous discussion of more robust mitigations including those identified by Council District 14, including but not limited to: <ol style="list-style-type: none"> 1. Capping disposal rates below permitted levels, ideally at current levels; 2. Establishing a mitigation fund and directing a portion of it to Los Angeles for use in addressing local impacts such as street repair; 3. Including specific plans to reduce off-site impacts on City of Los Angeles residents and businesses that are affected by waste hauling trucks that use local streets as access roads. The mitigation measures found in sections 3.3.7.9 (Litter Control), 3.3.7.10 (Noise Control), and 3.3.7.11 (Odor Control) all appear limited to on-site measures; 4. Expanding sorting to remove more recycling and hazardous materials out of loads brought to the landfill; |

| | | |
|------------------|-------|---|
| | | <p>5. Requiring low-carbon fuels and alternatives to more polluting vehicles;</p> <p>6. Structuring tipping fees to encourage clean-fuel vehicles where they cannot be restricted or regulated. Additional fees on dirtier vehicles could be used to subsidize a transition to cleaner fuels;</p> <p>7. Making greater use of transfer stations to reduce truck trips and the resulting mobile source emissions;</p> <p>8. Improving native vegetation, habitat and wildlife connectivity in the hillsides; and</p> <p>9. Further mitigating litter and debris. Current "inspection" for litter is not in itself adequate [section 3.3.7.9].</p> |
| 2 – Introduction | 2.4.3 | <p>Table 2.2 states that "Discretionary Approvals" may be required from the U.S. Army Corps of Engineers, the California Department of Fish and Wildlife, and the California Regional Water Quality Control Board-Los Angeles Region. Specify the approvals that may be required to allow proper consideration of impacts related to such approvals. Please also clarify the Statement of Overriding Consideration process and the process to secure a permit after a Statement of Overriding Consideration is accepted by the Glendale City Council.</p> |
| 6.1 -Aesthetics | | <p>TERA is concerned with the project's impact on aesthetics and views, particularly from vantage points in Eagle Rock. These concerns include:</p> <ul style="list-style-type: none"> • Degradation of two LA Historic Cultural Monuments, including the Eagle Rock and the Eagle Rock Recreation Center • The proposed increase in height from 1,525 ft to 1,705 ft AMSL • Views from Eagle Rock residential areas • Views while landfill is operating • Views once landfill is complete • Landscaping and screening • Degradation of Los Angeles streets <p>Please ensure that landfill height is not increased to a height that further impedes the views of Glendale, Pasadena, or Eagle Rock residents, and please add this mitigation to the Mitigation Monitoring and Reporting Program.</p> |

| | | |
|------------------|---------------------|---|
| 6.1 – Aesthetics | | Historic Monuments: The DEIR states, "The project site does not contain and is not located near any significant historical resource sites as identified in the Glendale General Plan" [NOP p 10]. However, daily dozens of dirty, noisy trucks transit immediately adjacent to at least two Historic Cultural Monuments in Los Angeles: the Eagle Rock and the Eagle Rock Recreation Center. Please include an analysis of impacts to these Historic Monuments in the DEIR, provide mitigations, and add these mitigations to the Mitigation Monitoring and Reporting Program. |
| 6.1 -Aesthetics | 6.1.4.1 | View 1, depicted in Figure 6.1-3, demonstrates only post-project vegetated conditions. It will take 13 years to complete the fill. Please also analyze the aesthetic impacts of the interim/project operation conditions. Please work with residents or representatives of Eagle Rock on increased vegetation and wildlife restoration of the Scholl Canyon Watershed. Please add vegetation and wildlife restoration to the Mitigation Monitoring and Reporting Program. |
| 6.1 -Aesthetics | 6.1.4.1 and 6.1.4.2 | The DEIR identifies significant but mitigable lighting impacts related to the proposed relocation of the equipment yard. However, the proposed new location for the equipment yard is not provided. Please identify the location of the potentially significant lighting impacts. |
| 6.1 -Aesthetics | 6.1.4.1 and 6.1.4.2 | Please add an analysis of heavy-duty vehicles and their visual, and wear and tear impacts on street conditions in the City of Los Angeles. TERA is concerned that the assumed impact of vehicle weight is underestimated. In Equation 1 b on page 33, if W is mean vehicle weight, then 11.4 tons is inaccurate. The 11.4 tons are weight of the material, not the gross vehicle weight which should be between 22.5 to 30 tons. It is furthermore unclear if the damage done to roads by vehicle weights is considered, and if so, if it is considered using estimates of round trips, using both loaded and unloaded weight. Identified traffic mitigations are improvements to SR-134 ramps. However such improvements do not resolve impacts should traffic worsen. A reduction of Level of Service on SR-134, could encourage waste hauling trucks to choose alternate routes such as Colorado Blvd. The impacts of "self-haulers" or private hauling vehicles that use the landfill deserve attention. While municipal vehicles from Glendale and Pasadena largely access the landfill via SR-134, private vehicles are more likely to use surface streets. These vehicles run the range of quality, model-year, upkeep and weight, and the resulting localized impact can |

| | | |
|-------------------|---------|--|
| | | <p>be serious. Unlike what may be available for municipal vehicles, there is virtually no recourse for negligence or pollution from these private vehicles.</p> <p>Please propose mitigation measures and add these mitigations to the Mitigation Monitoring and Reporting Program.</p> |
| 6.2 - Air Quality | | <p>TERA is concerned with the project's impact on air quality. These concerns include:</p> <ul style="list-style-type: none"> • Odors • Dust from earth movement • Dust from trucks • PM2.s from trucks and related health risks on nearby Eagle Rock residents <p>Specific comments noted below.</p> |
| 6.2 – Air Quality | 6.2.1.2 | <p>Environmental Setting. Please clarify and contextualize Eagle Rock and Glendale pollution levels in comparison to the rest of California, using Office of Environmental Health Hazard Assessment (OEHHA) CalEnviroScreen index. Such context should include indexes for air quality, Particulate Matter, Diesel, Solid Waste, Ozone, Toxic Releases, and Hazardous Waste.</p> <p>OEHHA's CalEnviroScreen shows that Eagle Rock and Glendale are disproportionately burdened by multiple sources of pollution, and that only 20% of CA census tracts have worse air quality than our communities Eagle Rock.</p> |
| 6.2 -Air Quality | 6.2.5 | <p>Construction (Variation 2) and onsite operation emissions would exceed the screening thresholds for NOx, PM10 and PM2.s. pursuant to the South Coast Air Quality Management District's (SCAQMD's) Localized Significance Thresholds (LST) Methodology. The exceedance of these screening thresholds indicates the need to conduct a health risk assessment in accordance with SCAQMD's LST methodology. Simply declaring the impacts significant and unavoidable without analyzing and disclosing the potential health risks of this exceedance is not appropriate. Please analyze and identify potential health along with corresponding mitigation measures. Please add these mitigations to the Mitigation Monitoring and Reporting Program.</p> <p>Please also include new court requirements from Sierra Club v. County of Fresno, Jun 30, 2014, where the court refined its previous test for air quality impacts analysis under CEQA, and now requires recirculation of an EIR due to its failure to specifically analyze the impacts on human health resulting from the change in air quality due to the project's air emissions.</p> |
| 6.2 -Air Quality | 6.2.5 | <p>In regards to odors, the Methodology section (6.2.3.3) states:</p> |

| | | |
|---------------------------------------|------------|---|
| | | <p><i>This analysis discloses all pertinent information that could result in potential odor impacts, including, but not limited to, information about the specific operational processes and any project design odor control features. Examples of control features include buffer zones, recommended screening distances, evaluation of the predominant wind direction and the frequency of temperature inversions in the vicinity of the SCLF, and evaluation of whether receptors would be located upwind or downwind of any odor source.</i></p> <p>However, the DEIR impact discussion doesn't appear to include such analysis. Instead, the DEIR dismisses odor impacts, relying on the lack of complaint in the past 10 years. Please provide further analysis of potential odor impacts and include appropriate mitigation measures to reduce impacts on Eagle Rock properties.</p> |
| 6.2 - Air Quality | 6.2.5 | <p>TERA is concerned with the emission of criteria pollutants of idling on-road vehicles queued at the entrance gates to the landfill and recommends the following mitigation measure to reduce impacts:</p> <p>6.11 – Transportation and Traffic 6.11.5</p> <p>AQ-14 Institute operation efficiency at the front gate/scales. There are currently multiple lanes that operate on a first come, first served basis. Dedicate one lane to vehicles (i.e. commercial vehicles) with accounts already setup with the landfill to expedite their entry into the landfill and reduce their idling time. All other vehicles that require extra time for check-in (e.g. self-haulers) would use a separate lane. This will greatly reduce the backup of vehicles waiting to check in.</p> <p>Please add this mitigation to the Mitigation Monitoring and Reporting Program.</p> |
| 6.7 - Hazards and Hazardous Materials | | <p>TERA is concerned with potential impacts related to landfill gas, such as volatility, potential for explosion, etc. The DEIR should include an analysis of potential landfill gas impacts and incorporate mitigation measures for safety as appropriate.</p> <p>TERA is also with the interaction of landfill gas with Toxic Releases in Eagle Rock and Glendale, of which OEHHA's CalEnviroScreen index indicates we are more burdened than 68% of all other California census tracts. Please analyze the potential impacts related to landfill gas and their interaction with toxic released, and provide mitigation measure for inclusion in the Mitigation Monitoring and Reporting Program.</p> |
| 6.10 - Noise | | <p>TERA is concerned with potential noise impacts on residents and other sensitive receptors in Eagle Rock. Specific comments are provided below.</p> |
| 6.10 - Noise | 6.10.4.1 & | <p>Does the analysis of operational noise rely on the discussion</p> |

| | | |
|---|----------|---|
| | 6.10.4.2 | <p>in Section 3.3. 7.10 Noise Control, which states that soil berms are installed once the top of the landfill has reached the elevation of the nearby ridgeline and there is a line-of-sight to a sensitive receptor within a half-mile radius? If so, what noise levels will be experienced at sensitive receptors during the 2-3 weeks it is anticipated to take to construct the berm(s)? In any case, to provide assurances that appropriate soil berms will be created, the Eagle Rock requests that a mitigation measure requiring compliance with the soil berm noise buffering technique identified in Section 3.3. 7.10 be included in the project's Mitigation Monitoring and Reporting Program.</p> <p>Area residents are already suffering noise impacts from the landfill and associated trucks, and these impacts must be mitigated through immediate, specific actions.</p> <p>Table 6.10-4 (Short-Term Noise Measurement Results) shows that Site 1, the only site studied in the City of Los Angeles, had the highest measured noise levels. Concerns about the noise and traffic associated with garbage trucks in this area and to the south appear to be justified, as these trucks were identified as major contributors to noise levels, with an average of 24 trucks passing per hour. The Lmax in this location approached 80 dBA at 1:21 PM, which is notable because 1:00 PM was not the loudest time of day at any of the long-term noise study sites.</p> <p>The mitigation for noise is inadequate [Sec. 12-10]. It promises no action on noise until tonnage reaches 2,600 tpd, or more than three and half times current tonnage, and leaves mitigation measures unspecified. Instead, mitigation measures such as those listed generally ["noise barriers, structural upgrades, traffic controls or similar measures"] should be identified, assessed and implemented beginning immediately.</p> <p>Mitigation measure N-1 in Table 1-2 states that "noise reduction recommendations will be coordinated with the City of Glendale." The City of Los Angeles has an obvious stake in the outcome of noise reduction and should be included in these coordinated efforts.</p> <p>In section 6.10-21 (Long-Term Landfill Operation), the Report also notes that the ambient average noise was approximately 68 dBA at Site 1 and therefore 68 dBA is the noise criterion level, but that elevated noise level is due in part to garbage trucks that are frequently driving to and from the Scholl Canyon Landfill. To count this as an "ambient" baseline masks the true impact of the landfill, because landfill operations are already contributing to worrisome noise levels.</p> |
| 6.11 - Transportation and Traffic | 6.11.4.1 | <p>The Signal Warrant Analysis determines that there would be no significant adverse impact to Avenue 64 in Pasadena because the refuse trucks "would be there to serve the local community and the amount of traffic would not change with or without the project." This is not the case for City of Los</p> |

| | | |
|--|---------------|--|
| | | <p>Angeles roads, which are impacted by refuse trucks that are not there to serve the local community of Los Angeles residents and businesses.</p> <p>Heavy-duty vehicles are making use of City of Los Angeles roads, with disproportionate and deleterious impact on street conditions and wear and tear. Mitigations for these impacts must be identified.</p> <p>TERA is concerned that the assumed impact of vehicle weight is underestimated. In Equation 1 b on page 33, if W is mean vehicle weight, then 11.4 tons is inaccurate. The 11.4 tons are weight of the material, not the gross vehicle weight which should be between 22.5 to 30 tons. It is furthermore unclear if the damage done to roads by vehicle weights is considered, and if so, if it is considered using estimates of round trips, using both loaded and unloaded weight.</p> <p>Mitigations identified are primarily improvements to SR-134 ramps. However such improvements do not resolve impacts should traffic worsen. A reduction of Level of Service on SR-134, could encourage waste hauling trucks to choose alternate routes such as Colorado Blvd.</p> <p>Please add mitigations to the Mitigation Monitoring and Reporting Program.</p> |
| <p>6.11 - Transportation and Traffic</p> | <p>6.11.5</p> | <p>TERA is concerned with vehicle congestion and recommends the following mitigation measure to reduce impacts:</p> <p>T-5 Reduce transportation and traffic impacts by strictly enforcing point of origin of waste and only accepting waste from the defined waste shed. Eliminate any additional traffic from waste loads coming from outside the waste shed. Enforcement should include documentation of the point of origin of materials for all loads accepted. (Additionally, attributing waste to the wrong City hurts their credit for diversion efforts.</p> |

Recipient: Ms. Debra Bogdanoff

Letter: Greetings,

Oppose Glendale's proposed expansion of the Scholl Canyon Landfill.

The clear threat of increased air pollution in Eagle Rock, as mentioned in the draft Environmental Impact Report, is one cause for alarm. Now we ask your help to stop this dangerous dump expansion.

The City of Glendale has released a draft Environmental Impact Report (EIR) and is seeking comment on proposed expansion of the dump, which includes two variations for the proposed project: a vertical expansion only (Variation 1) and a vertical and horizontal expansion (Variation 2). Variation 1 will extend the life of the dump by 13 years. Variation 2 will extend the dump's longevity by 19 years. Scholl Canyon dump is currently scheduled to close in 2021.

The Impact:

- * "Unavoidable adverse impacts related to local air quality" even after mitigation, according to the draft EIR.
- * Increased diesel exhaust from the hundreds of dump trucks entering the dump each day, leaving nearby residents breathing concentrated levels of diesel exhaust.
- * A garbage high-rise of 180 additional feet, or 14 stories tall!
- * Increased traffic-related noise for residents near Scholl Canyon Road between Ventura (134) Freeway and the 7800 block of N. Figueroa.
- * Adverse impact to the nesting habitat of some birds protected under the federal wildlife law, according to the draft EIR.

For these reasons, we believe that expansion of the Scholl Canyon Landfill is inappropriate and we ask you to oppose the adoption of the DEIR.

Comments

| Name | Location | Date | Comment |
|-------------------|-----------------|------------|---|
| Charlie Craig | Los Angeles, CA | 2014-07-14 | We live very close the the proposed expansion and it would have a clear and negative effect on our lives. |
| Jocelyn Gindraux | Los Angeles, CA | 2014-07-14 | I am opposed to it because of the increased air pollution it will bring to Eagle Rock. |
| Andrew Hindes | Los Angeles, CA | 2014-07-14 | As longtime area resident I oppose an expansion of a landfill located in a densely populated urban area. We will take whatever legal and political actions are necessary to stop this reckless plan. |
| Natalie Freidberg | Los Angeles, CA | 2014-07-14 | I live in Eagle Rock, not very far from the access road to the landfill. The proposed expansion will have a negative impact on my health, on my neighborhood and property value. |
| Carrie Havel | Los Angeles, CA | 2014-07-14 | I oppose the increased noise and air pollution this expansion would bring. |
| Brian Forsythe | Los Angeles, CA | 2014-07-14 | I live right over the hill from there and can already smell it on some mornings. |
| David Newsom | LA, CA | 2014-07-14 | Area impact - pollution, excessive truck traffic, area degradation |
| John Infantino | Los Angeles, CA | 2014-07-14 | This is unfair to Eagle Rock community and damaging to the environment. We should be closing the Scholl Canyon landfill and rehabilitating it, not expanding it. |
| Njeri Snyder | Los Angeles, CA | 2014-07-14 | I oppose the expansion of the Scholl Canyon Landfill. Close it NOW! |
| Herb West | Los Angeles, CA | 2014-07-14 | DO not need more air pollution and a REDUCED quality of life! |
| Janice Silvernail | Los Angeles, CA | 2014-07-14 | Diesel Exhaust problem because of health issues. |
| Maria Nazario | Pasadena, CA | 2014-07-14 | As the immediate past president of TERA, and current Board member, I have a vested interest in the welfare of Eagle Rock residents. I am still working on many projects in Eagle Rock that I committed to. Mid June i moved from 5218 Monte Bonito Dr., Eagle Rock which is 2 block from Figueroa and the Fwy. I experienced the issues with the trucks, the smell, and the fact that Figueroa St. pavement is constantly destroyed and the responsibility for fixing falls on LA's shoulders. Our tax dollars being used to fix an issue created by another city. This expansion is wrong in so many ways as presented. The impact to Glendale is minimal, while Eagle Rock shoulders the majority of the impact. I oppose the expansion as it currently is. |
| Catherine Jurca | Glendale, CA | 2014-07-14 | This dump poses too many problems for air quality, noise pollution, and wildlife. Do not expand the dump. |
| James Wirrick | L.A., CA | 2014-07-14 | Diesel fumes, traffic, pollution, etc. |
| Reg Willson | Eagle Rock, CA | 2014-07-14 | The proposed expansion, with its adverse health and visual impacts, will be less than 3000 ft from my property. |
| Anwar Zoueihid | Los Angeles, CA | 2014-07-14 | The environmental impact will be devastating to our health. |
| Richard Loew | Los Angeles, CA | 2014-07-14 | The trucks that use the Figueroa off ramp from the 134 east make a lot of noise gearing down for the hairpin turn. This goes on starting pretty early in the morning. |
| ROBERT INMAN | Los Angeles, CA | 2014-07-15 | Enough time has passed for the city of Glendale and the Sanitation Districts of LA County to have addressed the environmental injustice perpetrated on the community of Eagle Rock by this facility. Enough is enough. Either let the dump close in 2021 or let Glendale develop access into Scholl within its own boundaries. |
| Stephan Early | eagle Rock, CA | 2014-07-15 | Eagle Rock ends up with all the detriment and none of the benefits. |

| Name | Location | Date | Comment |
|---------------------------|------------------|------------|---|
| Molly Milner | Los Angeles, CA | 2014-07-15 | Please stop the proposed expansion of the of the Scholl Canyon Landfill. As a long time resident of Eagle Rock I am deeply concerned about the negative environmental impacts of this landfill on our community. Expansion of this dump will only intensify the air and noise pollution, not to mention heavy dirty, truck traffic in our community. Enough is enough! Stop the expansion! |
| Lucy Warren | Sherman Oaks, CA | 2014-07-15 | My parents live in Eagle Rock, and I am concerned about their health. We also stand to inherit their home one day, and plan to live there eventually. |
| Nancy Hopkins | Los Angeles, CA | 2014-07-15 | don't want increased air pollution |
| Timothy Campbell | Los Angeles, CA | 2014-07-15 | I live in Eagle Rock, and use the same entrance as the dump trucks use every day and it's already crowded and dangerous. Why would we allow more outdoor, unprotected garbage pollute the air near so many families in Eagle Rock and Glendale? |
| David Snyder | Eagle Rock, CA | 2014-07-16 | Let Glendale find alternative accommodations for their garbage. Close the Scholl Landfill! |
| Suzanne Smith | Los Angeles, CA | 2014-07-16 | This landfill is directly behind a very active recreation center that is heavily used by children. The increased exhaust from the diesel trucks going up Figueroa is extremely unhealthy for this vulnerable group. We have already lived for years with trucks and a landfill. Our children should not have to suffer because the residents of Glendale do not know what to do with their garbage. |
| kelly kissell | Los Angeles, CA | 2014-07-16 | Truck traffic and mostly more air pollution. |
| Greg Merideth | Los Angeles, CA | 2014-07-16 | The Scholl Canyon Landfill is only accessible through Eagle Rock. It currently produces traffic, noise, and air pollution. Expanding the landfill will exacerbate these problems by extending the life of the landfill. |
| Susan Thompson | Los Angeles, CA | 2014-07-17 | Opposed to expansion, we need to control our air quality now and this will not help the situation. Keep Eagle Rock and surrounding areas clean! |
| Lynne Vinkovic | Los Angeles, CA | 2014-07-17 | I live just a minute or two from the entrance to Scholl Canyon and there are too many trucks!!! |
| Michelle Coulter | Los Angeles, CA | 2014-07-17 | I live in Eagle Rock and want to reduce air pollution for my five year old daughter. |
| Christine Tucker | Los Angeles, CA | 2014-07-17 | I love Eagle Rock and not Glendale's trash coming through Eagle Rock! |
| Dawn Utsumi | Los Angeles, CA | 2014-07-17 | I am deeply concerned about the adverse impacts caused by any expansion, including negative impacts to the air quality. |
| Nancy Asmus | Los Angeles, CA | 2014-07-18 | Adverse effects on air quality, increased traffic and traffic-related noise and adverse impact on nesting habitat of some birds protected under the federal wildlive law. |
| William Bautista | Los Angeles, CA | 2014-07-18 | ENOUGH! |
| Carole Peterson-Van Dusen | Kagel Canyon, CA | 2014-07-18 | It is REALLY not good for the ground water and will pollute the area. |
| Michelle Hancock | Los Angeles, CA | 2014-07-18 | We need garbage out of this area. There are enough pollution problems due to transportation congestion without adding more. Find someplace else! |
| Carol Jung | Los Angeles, CA | 2014-07-18 | Safety and Health concerns |
| Diane Frey | Eagle Rock, CA | 2014-07-18 | The trash trucks are a burdensome addition to the traffic in the area. They add to the air pollution. The land fill should not be expanded. |

| Joshua Fisher | Los Angeles, CA | 2014-07-18 | <p>In addition to the air, water, and noise pollution, and traffic congestion already in the EIR, I would also like to point out that the extent of these types of pollution reach a much larger radius than typical due to the hill/mountaintop nature of the landfill location. We are part of the community on the hillside between Eagle Rock and Highland Park, facing Scholl Canyon, ~2.5 km/1.5 miles away, and are impacted by these disturbances like the landfill is much closer as little impedes a direct line between the landfill and the community.</p> <p>Eagle Rock is one of the fastest growing neighborhoods not just in LA, but in the entire country. This means that young people are moving in at a rapid rate, invigorating this part of North LA, and starting families. This type of demographic change and trajectory, in conjunction with proximity, is precisely NOT the type that one would want to so closely expand a landfill.</p> <p>We fully sympathize with the need to find new areas for landfills given the growing population. It costs more to transport further distances, and adds road congestion. Nonetheless, there is a trade-off between costs and effects, and in this particular case, the effects outweigh the costs.</p> |
| Azad Kurkjian | Los Angeles, CA | 2014-07-18 | I live here. |
| stuart robertson | Los Angeles, CA | 2014-07-18 | I am a home owner in Eagle Rock and the father of a 5 year old and I'm concerned with the additional pollution this expansion will create |
| Patrick Wells | Los Angeles, CA | 2014-07-20 | We live in Eagle Rock, both now and when Glendale opened that dump. The odor problem was really bad then and we wouldn't now wish it on current Eagle Rock residents. |
| Ellen Stern | Los Angeles, CA | 2014-07-21 | Air quality and noise pollution |
| William Georgiou | LOS ANGELES, CA | 2014-07-21 | Eagle Rock is a beautiful area and anything that adversely effects that and the health of it's residents should be stopped! |
| Jane Evans | Los Angeles, CA | 2014-07-22 | additional air impurity |
| SaraJane Thies | la, CA | 2014-07-22 | ecological quality |
| Mary Brennan | Los Angeles, CA | 2014-07-22 | <p>Eagle Rock is a beautiful community of individual family homes. Members of the community enjoy partaking in outdoor activities near the Scholl Canyon access road at the recreation Center and the Eagle Rock Canyon Trail which was created by local citizens.</p> <p>I am concerned about my own health and that of the members of my community.</p> |
| Patricia Duran | Los Angeles, CA | 2014-07-22 | Air quality is not to be taken lightly. What we breathe determines the quality of our lives. Using Eagle Rock streets to use their dump is wrong. We value our neighborhoods in Eagle Rock and I am offended that Glendale is using our streets affecting their wear and tear and interfering with the air quality. It is wrong! |
| DEBORAH DAVIS | Los Angeles, CA | 2014-07-23 | We have too much air pollution from the freeway already. |
| E. Carey Dietrich | Los Angeles, CA | 2014-07-23 | We value the quality of life we currently experience in Eagle Rock, and this expansion is an unacceptable threat. |
| robert vacca | Eagle Rock, CA | 2014-07-23 | Additional pollution, truck traffic, noise and only Glendale & Pasadena residents can use the facility. |
| Geoffrey Daniel | Los Angeles, CA | 2014-07-23 | We already have enough pollutants in the air; no more are needed! |
| Ernie Shelby | Los Angeles, CA | 2014-07-23 | We need to protect what air we have. More trash and toxic fumes sifting thru our air is not what we need. Stop this planned expansion of the Scholl Canyon Landfill |

|----------------------|-----------------|------------|--|
| Timothy Eckert | Los Angeles, CA | 2014-07-23 | As a resident and homeowner in Eagle Rock I am opposed to additional pollution in our community. |
| Maria Murillo | Los Angeles, CA | 2014-07-23 | As an Eagle Rock resident, I am opposed to increased dumping in the Scholl Canyon landfill. There will be increased chance of harmful pollutants in the air and our land. I would like to keep Eagle Rock a healthy place to raise a family! |
| Perry Portier | Los Angeles, CA | 2014-07-24 | Because I live In Eagle Rock |
| Kevin Tseng | Los Angeles, CA | 2014-07-25 | I would like to see Eagle Rock's air quality IMPROVE rather than get worse! |
| Timothy Steingraeber | Los Angeles, CA | 2014-07-25 | Environmental concerns for local residents and animals as well as quality of life issues related air pollution. |
| Scott Bogue | Los Angeles, CA | 2014-07-25 | We live right off of Figueroa and are heavily impacted by the existing truck traffic (which, I have been noticing recently, includes City of Pasadena garbage trucks). Besides the exhaust and noise issues. the stretch of Figueroa from the intersection with Monte Bonito up to the westbound 134 entrance is a dump in itself - debris from landfill truck traffic is all over the roads and sidewalks. It's a real mess that is cleaned up maybe once every few months. Glendale should be required to develop access through their neighborhoods rather than going through LA and taking responsibility for their impact on the community. |
| Margherita Long | Los Angeles, CA | 2014-07-26 | Air quality in Eagle Rock is a big concern to me and my family. We live just below the 134 and air quality is already poor. |
| Katerina Nitsou | Los Angeles, CA | 2014-07-26 | Local Resident. Good Citizen. |
| Oliver Fitzgerald | Los Angeles, CA | 2014-07-26 | Local Resident. Good citizen. |
| Mark Werts | Los Angeles, CA | 2014-07-28 | I live in Eagle Rock. |
| Jane Lingua | Eagle Rock, CA | 2014-08-04 | Severe negative impact on our community makes this an untenable proposal. |
| Andrew Turner | Los Angeles, CA | 2014-08-07 | I am a homeowner that lives very close to the Scholl Canyon landfill. My wife and I have two small children. We love Eagle Rock and plan to raise them here. I want to insure that my kids will be able to grow up in an environment that won't cause them respiratory health problems. |
| Anna Kia | Los Angeles, CA | 2014-08-07 | Air quality matters because it affects my family's health. I'd like to see them use modern alternatives to this landfill expansion instead. |
| Pia Harris | Los Angeles, CA | 2014-08-09 | there are too many dumpsites already around the vicinity/surrounding areas, being a resident of eaglerock for nearly 30 years, Opposes the proposed expansion of Scholl Canyon Landfill |
| evelyn cabrera | los angeles, CA | 2014-08-09 | environmental issues are extremely important to my family, community |
| Craig Hutton | Los Angeles, CA | 2014-08-09 | I live in Eagle Rock. I have to breathe the air from the Scholl Canyon Dump. I have to breathe the exhaust of the trucks moving trash to the dump - AND IT'S NOT EVEN EAGLE ROCK'S TRASH!!! I have to put up with the traffic and the extra wear and tear on Eagle Rock's roads from having Glendale's garbage carrying trucks going through my town. Do we get any benefit from this? NO. As far as I can see, it's all negative impacts on the citizens of Eagle Rock, and those negatives should not be tolerated any more. |
| David Gustavson | Los Angeles, CA | 2014-08-10 | This will be an eyesore. |
| DOLORES BROWN | LOS ANGELES, CA | 2014-08-13 | More smog, traffic and congestion with no benefit to Eagle Rock |
| Gloria Medel | Los Angeles, CA | 2014-08-21 | Air quality control |

|---------------------|-----------------|------------|---|
| Cheryl Leutjen | Los Angeles, CA | 2014-08-22 | The time for landfills-as-usual is over. Landfills are a significant source of methane, a greenhouse gas 20 times more potent than CO2. About 2/3 of waste generated in the US is organic and could be composted in a commercial facility, thereby avoiding the need to make our landfills -- and creation of greenhouse gases -- bigger and bigger. Education and increased composting facilities are the only sustainable way to reduce the waste we generate and to make beneficial use of that which we do. |
| Mary Tokita | Los Angeles, CA | 2014-08-22 | Pollution, trash and road maintenance impact on our community with no benefit to our residents or stakeholders who are negatively impacted |
| Mary Tokita | Los Angeles, CA | 2014-08-22 | It's time to end this environmental injustice. |
| barrett cooke | la, CA | 2014-08-22 | its my hood! |
| Lani Stapp | Eagle Rock, CA | 2014-08-23 | No more using L.A.s roads for Glendale's trash. I listened to the message of the benefits for expanding the dump. None of those benefits benefitted Eagle Rock or L.A. They all impacted Eagle Rock in a negative way |
| Theatrice Westbrook | Los Angeles, CA | 2014-08-23 | This seems to only impact my neighborhood negatively. |
| John Wagner | Los Angeles, CA | 2014-08-25 | I want to reduce the environmental impact of the dump on my neighborhood. |

Recipient: Ms. Debra Bogdanoff

Letter: Greetings,

Oppose Glendale's proposed expansion of the Scholl Canyon Landfill.

The clear threat of increased air pollution in Eagle Rock, as mentioned in the draft Environmental Impact Report, is one cause for alarm. Now we ask your help to stop this dangerous dump expansion.

The City of Glendale has released a draft Environmental Impact Report (EIR) and is seeking comment on proposed expansion of the dump, which includes two variations for the proposed project: a vertical expansion only (Variation 1) and a vertical and horizontal expansion (Variation 2). Variation 1 will extend the life of the dump by 13 years. Variation 2 will extend the dump's longevity by 19 years. Scholl Canyon dump is currently scheduled to close in 2021.

The Impact:

- * "Unavoidable adverse impacts related to local air quality" even after mitigation, according to the draft EIR.
- * Increased diesel exhaust from the hundreds of dump trucks entering the dump each day, leaving nearby residents breathing concentrated levels of diesel exhaust.
- * A garbage high-rise of 180 additional feet, or 14 stories tall!
- * Increased traffic-related noise for residents near Scholl Canyon Road between Ventura (134) Freeway and the 7800 block of N. Figueroa.
- * Adverse impact to the nesting habitat of some birds protected under the federal wildlife law, according to the draft EIR.

For these reasons, we believe that expansion of the Scholl Canyon Landfill is inappropriate and we ask you to oppose the adoption of the DEIR.
